

Eberl Inspections App

Step-by-step guide to downloading and installing the app on your
Android device

Android · APK Installation Guide

BEFORE YOU START

This app is distributed as an APK file — not through the Google Play Store. Your device may show a security warning when installing. This is **expected and safe** for Eberl-distributed apps.

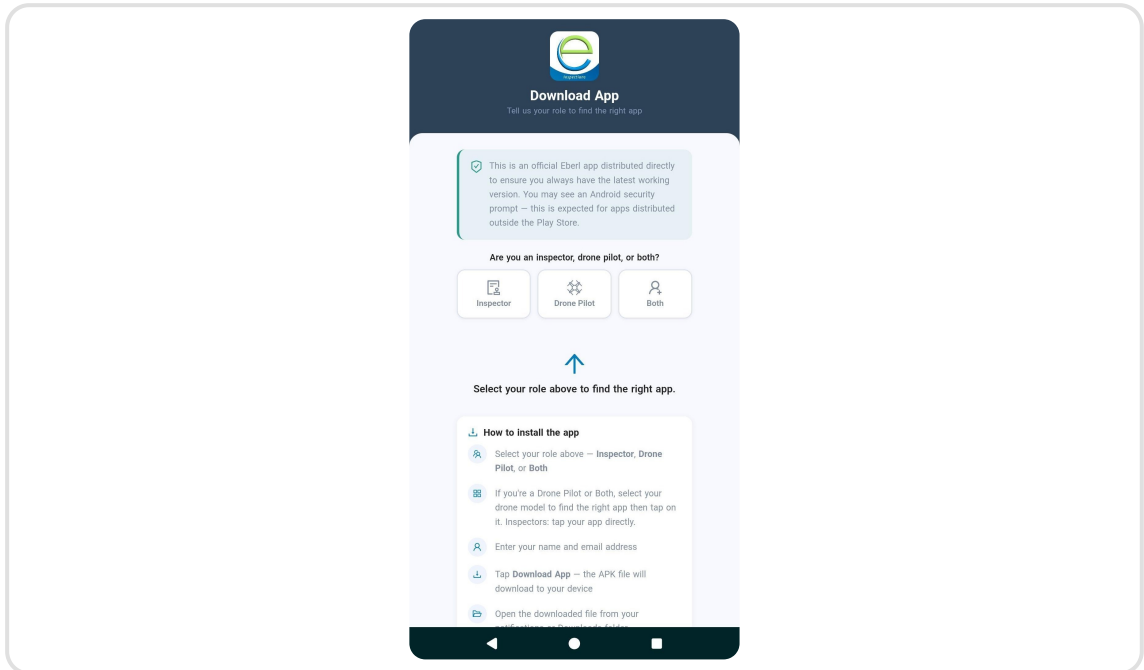

Make sure you are on an **Android device**. iOS (iPhone/iPad) is not supported for APK installation.

1

Open the download page

On your Android device, open your browser and go to:

io-360.eberls.com/app-download

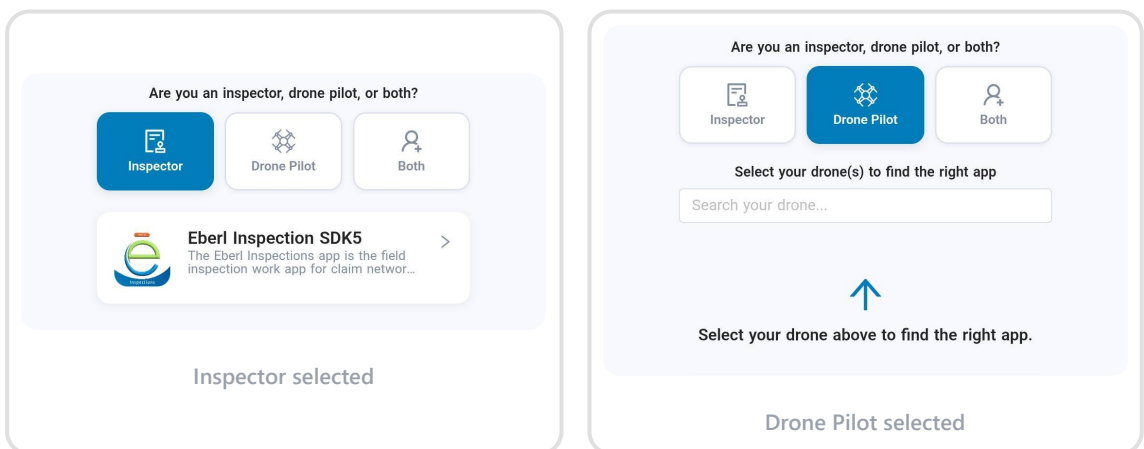

2

Select your role

Tap the button that best describes your role.

Inspector — an app card appears immediately, skip to Step 4.

Drone Pilot or **Both** — a drone search field appears below, continue to Step 3.

Select your drone *(Drone Pilot & Both only)*

Tap the search field and type your drone model. You can select multiple drones — the app list will update to show the compatible apps.

If your drones are split across both apps, you will need to download **each app separately** for the drone it supports. Go back to the landing page and repeat the process for each app.

If a drone appears in both apps, the one marked **Recommended** is fully compatible with that particular drone model — download that one for the best experience.

If your drone does not appear in the list, select **Other** — the correct app will be shown for you.

Are you an inspector, drone pilot, or both?

Compatible apps shown for your selected drone(s)

4

Tap on the app card

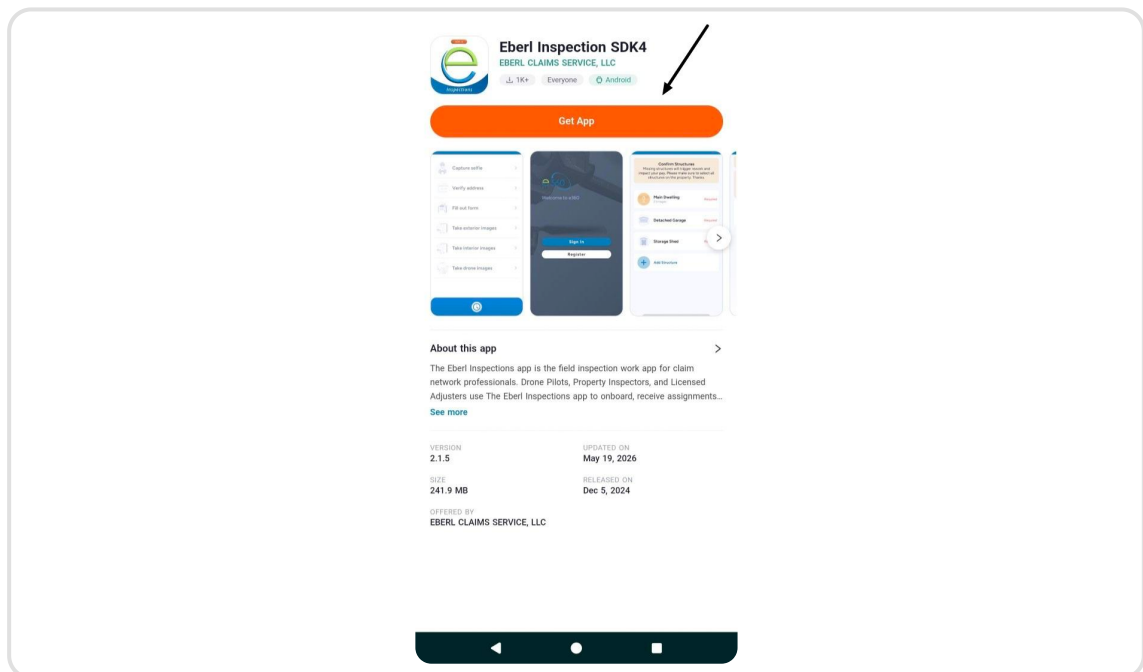

Once your compatible app cards appear, tap the card for the app you need to download. This will open the app detail page.

5

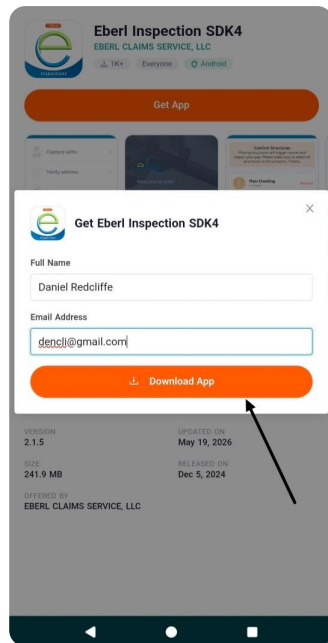

Tap "Get App"

On the app detail page, tap the **Get App** button to open the download form.

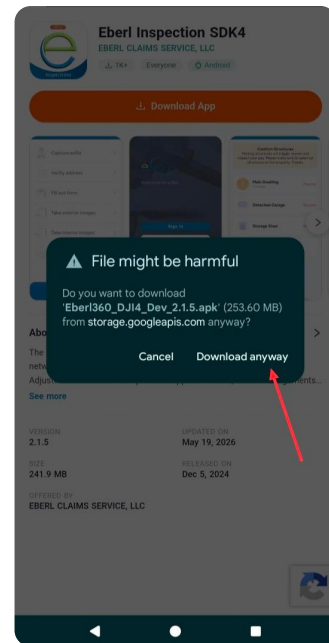

Enter your name and email

A form will appear. Enter your **full name** and **work email address**, then tap **Download App**.

Fill in name & email, tap Download App

Tap "Download anyway" on this Chrome warning

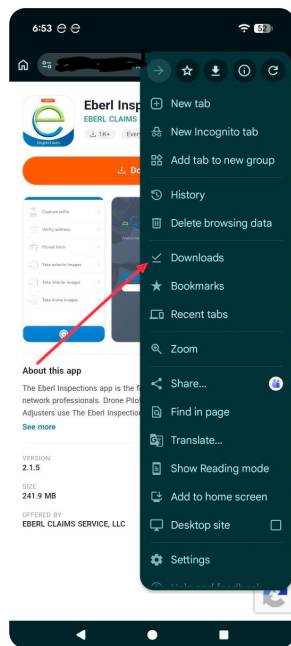

Your details are saved on this device. Next time you visit you can re-download directly without filling the form again.

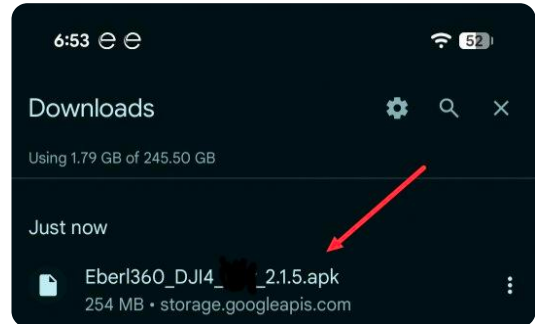

7

Open the downloaded file

The APK file will download to your device. Open your **notification bar** or go to your **Downloads folder** and tap the file to begin installation.

Tap : menu → Downloads

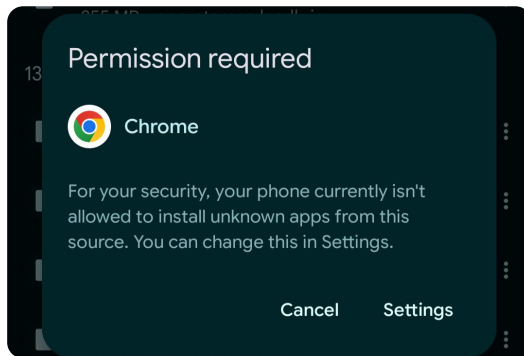

Tap the APK file to install

Allow installation from unknown sources

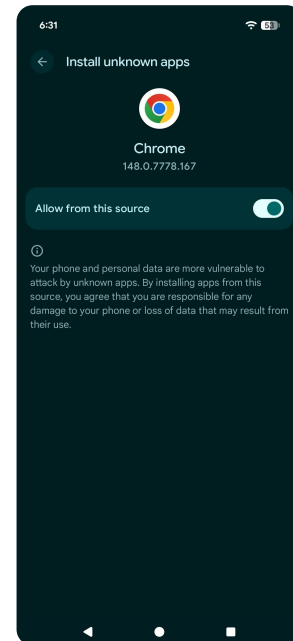

Android will show a **Permission required** dialog saying Chrome is not allowed to install apps. Tap **Settings**. On the next screen, toggle **Allow from this source** to ON, then press the back button — Android will resume the installation.

This prompt only appears the first time. You will not see it again for future updates from the same browser.

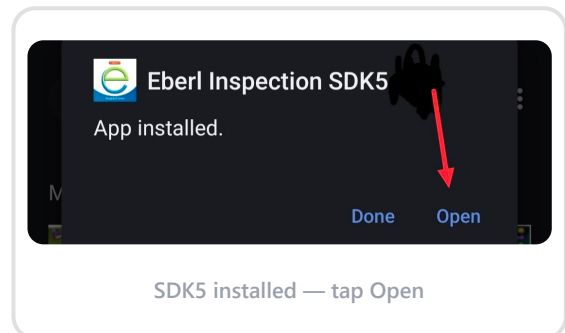

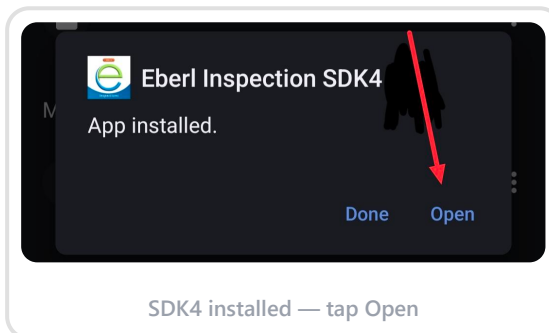

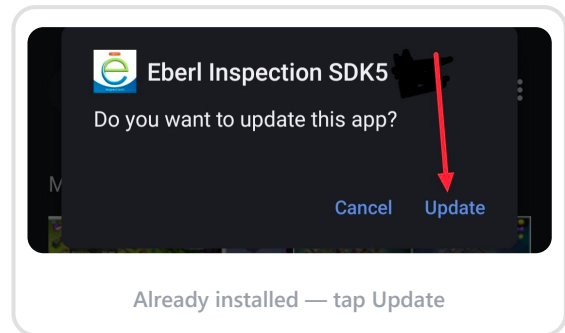

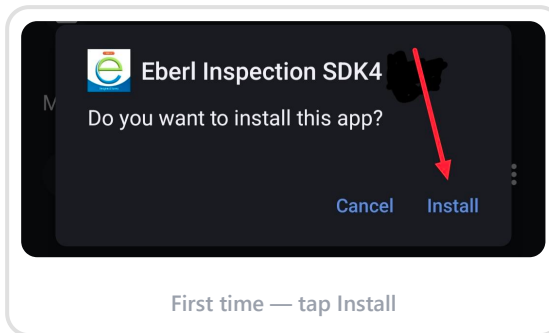

Tap Settings on this prompt

Toggle ON, then press back

Tap Install or Update

Android will ask to confirm the installation. If this is your first time, tap **Install**. If you already have the app installed, it will say **Update** instead — tap that. Once complete, tap **Open**.

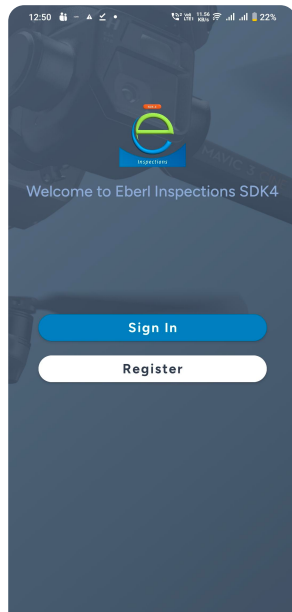

Sign in to the app

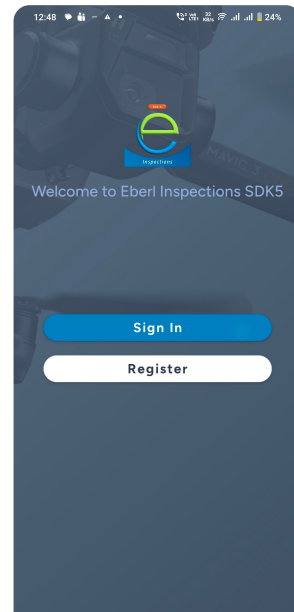

The app will launch to the sign-in screen. Tap **Sign In** to log in with your Eberl credentials, or **Register** if you are new.

Installation complete! You're ready to receive assignments and start inspecting.

Eberl Inspections SDK4

Eberl Inspections SDK5

You're all set!
